

INEOS BRITANNIA

CNC MACHINE OPERATOR

TEAM OVERVIEW

Backed by INEOS Founder and Chairman Sir Jim Ratcliffe and led by the most successful Olympic sailor of all time, Sir Ben Ainslie, **INEOS Britannia**, who has joined forces with the **Mercedes-AMG Petronas F1 Team**, as the Challenger of Record for the **37th America's Cup**. The British team, who will race for the Royal Yacht Squadron, was formed in 2014 before joining forces with INEOS in 2018 and is now embarking on their third consecutive campaign to finally bring home the Auld Mug, the oldest trophy in international sport. A trophy that Britain has never won.

Everyone in the team from the ground up is rooted in the same belief, that we are here to win and our laser focus extends to the whole of the support team, which needs to cope with the challenges of a three year campaign.

ROLE OVERVIEW

The **CNC MACHINE OPERATOR** is an exciting opportunity which will play an integral role in the UK based operations and the shore operations, reporting directly to the Technical Manager

THE SUCCESSFUL CANDIDATE

Organised. Dependable. Level Headed. Accurate. Thorough. Pleasant and willing to get stuck in.

CONTRACT DETAILS

This role is a full time, fixed term contract through to Summer 2024. You will initially be based in Turweston, UK and further international travel may be required.

KEY RESPONSIBILITIES

- Setting and operating multi-axis CNC mill / turn machine tools to achieve maximum efficiency and the highest quality standards for the manufacture of precision engineered metallic components.
- Competent use of Siemens NX CAM software to support our dedicated CAM Programmers for CNC code optimisation and troubleshooting to deliver improvements as required.

- Maximising throughput and overall machine tool efficiency.
- Operating and maintaining all other equipment in the team's small bespoke machine shop
- Managing stocks and supplies as needed
- Manage movement and set up of machines and checking calibrations (training can be provided)
- Ensuring that safety equipment is up to date and in good working order
- Working on various other projects as part of the shore operations team
- Assist with race yacht preparation where necessary
- Assist with logistical operations like setting up bases, loading and unloading shipping containers
- Dynamic and capable meeting challenging deadlines within a fast-paced environment.

CANDIDATE PROFILE

- Proven background of operating 2 axis lathes and multi axis machine tools, including mill/turn machines and other basic machine shop equipment
- Must be skilled in G-code programming (or similar), tooling, set up and teardown of CNC machines
- Effective communication skills and ability to remain focussed
- Good at problem solving
- Have an eye and an attitude for accuracy and doing things right
- Operation of manual machines (lathes and mills) is preferred
- Someone comfortable with traveling and operating in different environments
- Being part of a team is crucial to the success of this person
- Must have a "can-do" attitude
- Other training like first aid or forklift operators training beneficial but not required
